

# NightJAMMM

A photograph of two fountain pens, one with a dark wood-grain finish and one with a black finish, lying diagonally across a piece of white paper. Above the pens is a small, dark, square inkwell. The entire scene is set against a light brown, textured background. A green plant with small leaves is visible on the right edge of the frame.

# TRANSCRIBE

The application is a communication platform for realtime chat between two or more users. They can chat through command line to other users in the same chat server. We utilized Google Translate API to translate one user's preferred language to the other user's preferred language. Essentially, users can communicate easily and effectively in multiple languages at the same time.

# James Dunn - Project Manager

- I'm a lifelong musician. I've played guitar and drums since I was a youngster.
- I received my M.A. in Philosophy from Brandeis University in Massachusetts

## How did the project go?

- My contributions:
  - Project management
  - Translation functionality
  - Refactoring/modularization
- What went well:
  - Everything/teamwork
- Things I learned:
  - Be comfortable delegating
  - Planning and dialogue is really increases efficiency

# Nadya Ilinskaya - DevOps

- I'm from Saint-Petersburg, Russia
- I'm breaking software for living, but really enjoy learning how to build it
- When I'm not at work or at school and my husband, kids, cat and dog are all set - I can enjoy some nap on the floor >.<

## How did the project go?

- My contributions:
  - Idea
  - Deployment Support
- What went well:
  - Communication
- Things I learned:
  - Good communication is a key to success

# Anna Li - Lead Developer

- I'm originally from Ohio, moved to Washington 3 years ago
- I work at Zillow currently doing tech support for rental listings

## How did the project go?

- My contributions:
  - Overall skeleton of the project
    - Helped integrate translation
    - Helped integrate displaying data from database
- What went well:
  - Setting up sockets to interact. Translating and adding a database
- Things I learned:
  - I learned about Sockets!

# Meron Sibani - Lead Tester

- · I am originally from Ethiopia moved to States three years ago
- · Currently I am raising my beautiful daughter

## HOW DID THE PROJECT GO?

1. My contribution is making sure that our application has all required test cases and unit tests passed
2. Working with team and having our final product
3. My challenge was figuring out how to mock Sockets, it did take me a while Until I get a recommendation to focus on only functionalities than mocking sockets.
4. Things I learned working with team is good and helps to narrow down the problem and get things done as a group

# Martin Balke - Code Reviewer

- I love solving problems
- I'm a professional chef and baker currently
- I love going to farmers markets and cooking with all of the great ingredients in Washington

## How did the project go?

- My contributions:
  - Database integration
- What went well:
  - The planning stage of this project was really great
- Things I learned:
  - I learned a lot about how to test databases

# Morgan Shaw - Documenter

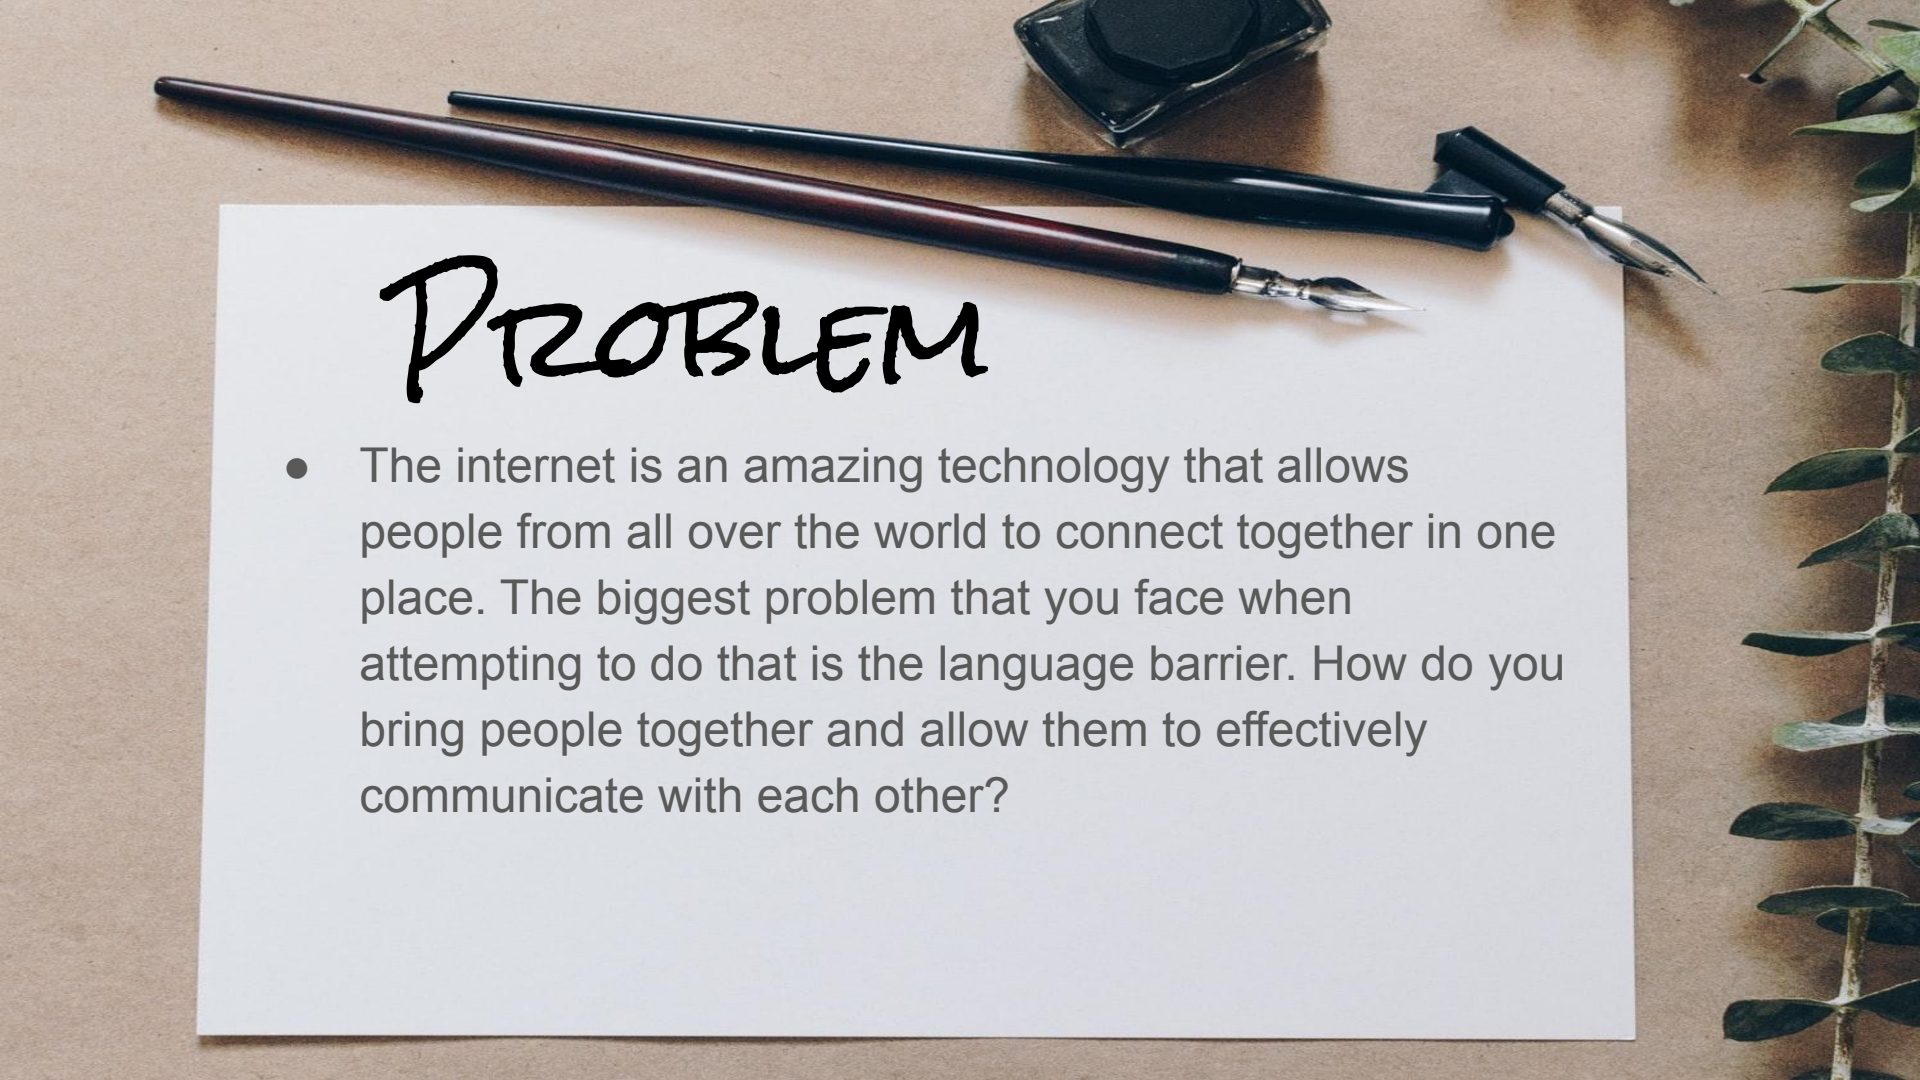

- I am from Texas & graduated from Texas A&M University.
- I currently work for Zillow Group.
- I am a proud parent of a Saint Bernard & a black cat

## How did the project go?

- My contributions:
  - Primarily Documentation & Readme
- What went well:
  - Communication with the team
- Things I learned:
  - A LOT about JSDocs! File structures too

A top-down view of a desk with a light brown wooden surface. Two fountain pens, one dark wood and one black, lie horizontally across the upper half of the frame. A small, dark, square inkwell is positioned above the pens. On the right side, a green eucalyptus branch with small leaves extends vertically. In the center, a white rectangular card is placed, featuring the word 'PROBLEM' in a large, handwritten-style font and a single bullet point below it.

# PROBLEM

- The internet is an amazing technology that allows people from all over the world to connect together in one place. The biggest problem that you face when attempting to do that is the language barrier. How do you bring people together and allow them to effectively communicate with each other?

A photograph of a piece of white paper with handwritten text and a bulleted list. The paper is placed on a brown, textured surface. Above the paper, two fountain pens (one dark wood, one black) and a small black inkwell are visible. To the right of the paper, a green plant with small leaves is partially visible.

# SOLUTION

- We created an application that will translate each message into the user's preferred language.
- This allows users to have a conversation while using their preferred language and no additional work on their part.

A photograph of two fountain pens, one dark wood-grained and one black, lying diagonally across a white piece of paper. Above the pens is a small, dark, square inkwell. The entire scene is set against a light brown, textured background. A green plant with small leaves is visible on the right edge of the frame.

# DEMO

1. Open your terminal
2. `npm install -g transcribe-chat`
3. `ts-chat`

A top-down view of a desk with a light brown wooden surface. Two fountain pens, one with a dark red barrel and one with a black barrel, lie diagonally across the upper half of the frame. A small, dark, square inkwell is positioned near the top center. On the right side, a green plant with small, rounded leaves is visible. A white rectangular card is placed in the center of the desk, featuring the word 'WINS!' in large, handwritten black letters and a bulleted list of five items.

# WINS!

- Working Chat
- Translation
- Database
- User Experience
- NPM Package

A top-down view of a brown textured surface. A white rectangular notepad is placed on it. Two fountain pens, one dark red and one black, lie diagonally across the top of the notepad. A small black inkwell is positioned above the pens. On the right edge of the notepad, a green eucalyptus branch with small leaves is visible. The word 'FUTURE!' is written in a large, black, handwritten font on the left side of the notepad.

# FUTURE!

- Authentication Integration
- Private Chat & Chat Rooms
- Pop-up Notifications
- Front-End
- Images & Emojis

# WORKFLOW

- Trello for task management
- GitHub for version control
- Slack for communication
- Team meetings

Two fountain pens, one with a dark wood-grain barrel and the other with a black barrel, lie diagonally across the top of a white sheet of paper. Above them is a small, dark, square inkwell. The entire scene is set against a light brown, textured background, possibly a desk or table. A green plant with small leaves is visible on the right edge of the frame.

# TESTING

We tested our database & chat application

- Testing database helps us keep valid data in our database
- Testing chat helps us ensure our accuracy of our functions for the application

Two fountain pens, one with a dark wood-grain barrel and the other with a black barrel, lie diagonally across the top of a white sheet of paper. Above them is a small, dark, square inkwell. The entire scene is set against a light brown, textured background. On the right edge, a portion of a green plant with small, rounded leaves is visible.

# GROWTH

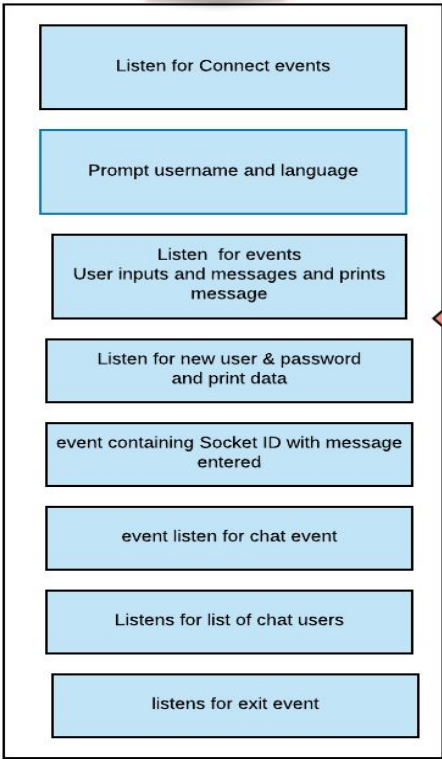

- Version management
- Collaboration & Trust
- Communication
